

Installation Guide for AspCoreGen 9.0 MVC

This guide will show you how to install AspCoreGen 9.0 MVC. The installation is easy enough that most developers won't need this guide; you simply need to follow all the prompts given by the wizard during the installation. This guide is not specific to any version of this software; therefore you can use this guide for the Professional Plus and Express editions of AspCoreGen 9.0 MVC.

1. *Double-click* the **AspCoreGen6MVCPProPlusSetUp.msi** file to start the installation. See Figure 1.

Figure 1

2. The Splash Screen is the first dialog that will show up as shown in Figure 2. Click the *Next* button.

Figure 2 Splash Screen

3. Next, the Welcome Screen as shown in Figure 3. Click the *Next* button.

Figure 3 Welcome Installation Screen

4. Read the License Agreement, then choose the *I Agree* option. Click the *Next* button. See Figure 4.

Figure 4 License Agreement

5. The next screen shows you the Installation Folder where AspCoreGen 9.0 MVC will be installed. Click the *Next* button. See Figure 5.

Figure 5 Installation Folder

6. Click the *Next* button to confirm and start installation. See Figure 6.

Figure 6 Confirm Installation

7. The installation begins. It will show a few screens during the installation. Click the Yes button on the Windows User Account Control pop up if and when it comes up, See Figure 7. AspCoreGen 9.0 MVC will quickly install, click Finish in the last screen as shown below.

Figure 7 Windows User Account Control Pop Up

8. AspCoreGen 9.0 MVC will quickly install. It will show the Installing Dialog as seen in Figure 8, and then the Installation Complete screen when done with the installation, See Figure 9. Click the *Finish* button in the last screen as shown below.
